Plant and Soil **158**: 307–310, 1994.

Contents Volume 158 (1994)

Research articles

Redox transformations and plant uptake of selenium resulting from root-soil interactions 1
M.J. Blaylock, B.R. James

Mineral content of leaves from trees growing on serpentine soils under contrasting rainfall regimes in Puerto Rico 13
E. Medina, E. Cuevas, J. Figueroa, A.E. Lugo

The effect of short term withdrawal of NaCl stress on nodulation of white clover 23
J. Ikeda

Plant nutrient efficiency: A comparison of definitions and suggested improvement 29
C.J.P. Gourley, D.L. Allan, M.P. Russelle

Phosphorus effects on root growth and development in two maize genotypes 39
M.A. Hajabbasi, T.E. Schumacher

Genetic allelism and linkage tests of a soybean gene, *Rfg1*, controlling nodulation with *Rhizobium fredii* strain USDA 205 47
T.E. Devine, L.D. Kuykendall

Phosphorus efficiency and the forms of soil phosphorus utilized by upland rice cultivars 53
M.J. Hedley, G.J.D. Kirk, M.B. Santos

Effect of carbon source on growth, nitrogenase and uptake hydrogenase activities of *Frankia* isolate from *Casuarina* sp. 63
A. Sellstedt, P.A. Rosbrook, L. Kang, P. Reddell

Characterization of organic matter in a forest soil of coastal British Columbia by NMR and pyrolysis-field ionization mass spectrometry 69
C.M. Preston, R. Hempfling, H.-R. Schulten, M. Schnitzer, J.A. Trofymow, D.E. Axelson

Mycorrhizal infection of *Agrostis capillaris* population on a copper contaminated soil 83
W.A.J. Griffioen, J.H. Ietswaart, W.H.O. Ernst

Relationship of *Pseudomonas syringae* pv. *tabaci* races to the rhizosphere of Wisconsin-grown tobacco 91
K.K. Knoche, J.L. Parke, R.D. Durbin

Patterns of short-term amino acid accumulation and loss in the root-zone of liquid-cultured forage rape (*Brassica napus* L.) 99
T. Shepherd, H.V. Davies

Effect of exogenous amino acids, glucose and citric acid on the patterns of short-term accumulation and loss of amino acids in the root-zone of sand-cultured forage rape (*Brassica napus* L.) 111
T. Shepherd, H.V. Davies

Response of vesicular-arbuscular mycorrhizas of maize to various rates of P addition to different rooting zones 119
S. Lu, P.G. Braunberger, M.H. Miller

Short communications

Root architectural responses of *Betula lenta* to spatially heterogeneous ammonium and nitrate 129
R.C. Crabtree, G.M. Bernston

Number of Rhizobia and delayed inoculation influence nodulation of clovers 135
N. Nazih, R.W. Weaver

Seedling root response of some Kenyan bread wheat cultivars grown in acid nutrient culture solution containing aluminum 141
J.M. Nyachiro, K.G. Briggs

Automated measurement of root length with a three-dimensional high-resolution scanner and image analysis 145
A.L. Smit, J.F.C.M. Sprangers, P.W. Sablik, J. Groenwold

Review

Measurement of nitrogenase activity in legume root nodules: In defense of the acetylene reduction assay 151
J.K. Vessey

Research articles

Reply to 'Measurement of nitrogenase activity in legume root nodules: In defense to the acetylene reduction assay' by J.K. Vessey 163
F.R. Minchin, J.F. Witty, L.R. Mytton

Isotopic fractionation accompanying fertilizer nitrogen transformations in soil and trees of a Scots spine ecosystem 169
H. Nõmmik, D.J. Pluth, K. Larsson, M.K. Mahendrappa

Role of proteinaceous amino acids relased in root exudates in nutrient acquisition from the rhizosphere 183
D.L. Jones, A.C. Edwards, K. Donachie, P.R. Darrah

Genetic variation in pigeon pea (*Cajanus cajan* (L.) Mill sp.) in response to successive cycles of water stress 193
P.M. Kimani, A. Benzioni, M. Ventura

Influence of nitrogen, plant growth stage, and environment on charcoal rot of grain sorghum cuased by *Macrophomina phaseolina* (Tassi) Goid 203
G.L. Cloud, J.C. Rupe

Relationship between the number of bacteria added to soil or seeds and their abundance and distribution in the rhizosphere of alfalfa 211
P.B. Hatzinger, M. Alexander

Long-term comparative study of soil nitrate test, Gilat plant indicator method and wheat nitrogen uptake 223
J. Amir, I. Mufradi, S. Klitman, S. Asido

Root growth and nitrogen uptake in sycamore (*Acer pseudoplantanus* L.) seedlings in relation to nitrogen supply 233
L.A. Mackie-Dawson, S.M. Pratt, P. Millard

The effects of whole-tree clear-cutting on soil processes at the Hubbard Brook Experimental Forest, New Hampshire, USA 239
R.A. Dahlgren, C.T. Driscoll

Residue fractionation and decomposition: The significance of the active fraction 263
B. Vanlauwe, L. Dendooven, R. Merckx

The effect of C:P ratio of plant residues added to soils of contrasting phosphate sorption capacities on P uptake by *Panicum maximum* (Jacq.) 275
G. Umrit, D.K. Friesen

Is the isotopically exchangeable phosphate of a loamy soil the plant-available P? 287
C. Morel, C. Plenchette

Short communication

Inhibition of methane evolution by calcium sulfate addition to flooded rice 299
C.W. Lindau, D.P. Alford, P.K. Bollich, S.D. Linscombe
